

# Convert-C

RETURNED CONCRETE  
TREATMENT ADMIXTURE

## Convert your Concrete Problems into Reusable Solutions

**Chryso®Convert C, transforms returned plastic concrete into a dry, hardened, granular state, making it easy to handle and reuse. Packaged in convenient water-soluble bags, for efficiency and ease of use. This not only simplifies the washout process but also significantly reduces waste, promoting sustainable practices and cost-efficiency in your operations.**

Adding Chryso®Convert C directly into the mixer drum is easy, fast and efficient. After the discharge of the granular material, a standard washout procedure can be used to clean the drum.

### Why Choose Convert?

- **Efficient Process:** Added directly into the mixer drum saves time and ensures minimal disruption to your workflow.
- **Reusable Solution:** Converts leftover concrete into reusable material, helping you minimize waste and make the most of your resources.
- **Cost-Effective:** Reduces disposal costs and makes the most of your resources.

### How it Works?

- **Simple Addition:** Add the water-soluble bags directly into the mixer drum.
- **Transformation:** The product quickly transforms returned plastic concrete into a dry, hardened, granular state.
- **Easy Discharge:** Discharge the granular material effortlessly.
- **Standard Washout:** Follow up with a standard washout procedure to clean the drum.
